

**VLAD**  
**FULL STACK DEVELOPER**

<p><b>PERSONAL SKILLS</b></p>	<p>Over 8 years of professional work experience. I am a full stack developer but I like to develop in the direction of Back-end using Node.js (JavaScript, TypeScript). There is an experience of leading a small team of software developers. Also, I have experience in PHP, MySQL, PostgreSQL, MongoDB, Python, HTML, CSS, Git, Linux administration, etc. At the moment, I am immersed in the study of Blockchain (Proof-of-Brain, Delegated Proof-of-Stake) and Machine Learning (Gradient boosting).</p>
<p><b>SKILLS SUMMARY</b></p>	<p>JavaScript Back-End Development: TypeScript, Node.js, Express, async/await, mongoose, JWT, Passport, memcached, Gulp, Grunt, Babel, Webpack, PM2, MongoDB, PostgreSQL, MySQL, Redis, <a href="http://socket.io">socket.io</a>, ActiveDirectory, WSDL/SOAP, npm/nvm; JavaScript Front-End Development: Angular2 (&gt;6), Ngrx/Store, HTML5, CSS3, Bootstrap, SASS (SCSS), LESS, Jade, ReactJS, Redux, Bower, RequireJS; PHP Back-End Development: creating procedures and triggers in MySQL, memcached, Redis, Composer, practical use OOP in architectures MVC/HMVC, Symfony (1.x, 2.x), Laravel (3.x), Yii (1.x), CMS such as Magento (1.x, 2.x), WordPress (3.x) and etc.</p>

<p><b>WORK EXPERIENCE</b></p>	<p>May 2018 - Currently  <b>Full Stack Developer, Team Lead at International knowledge platform `Innovation and Development Foundation` (Kiev, Ukraine)</b>            Back-end development on TypeScript using Node.js with Express, async/await, MongoDB DBA, PM2, Strapi;            Front-end development on TypeScript using Angular2 (&gt;6), NgRx/Store, Karma, Jasmine, Protractor, Webpack;            Acquired skills:            Synchronization with Blockchain project <a href="http://steem.io">steem.io</a></p> <p>May 2016 – May 2018  <b>Full Stack Developer at Startup `TriggMine` (Kiev, Ukraine)</b>            Back-end development using Node.js (Express, Gulp, PM2);            Front-end development main project using ReactJS, Redux, Jest, Webpack;            Back-end development of plugins (extensions) for e-commerce CMS using PHP;            Support and debugging projects;            Bugs fixing, code review;            Acquired skills:            Improve skills of a variety CMS;            Understanding the conceptual principles of a Startup.</p> <p>January 2013 – May 2016  <b>Full Stack Developer at IT Distributor `MUK` (Kiev, Ukraine)</b>            Back-end development using Node.js with Express, Passport, Memcached, ActiveDirectory, SOAP, Gulp, PM2.            Back-end development using PHP with Bitrix Framework, Memcached, SOAP.            Front-end development using HTML5/CSS3 with Bootstrap, RequireJS, jQuery, DataTables.            MySQL and MongoDB database design.            RESTful API development (with documentation).            Fine-tuning nginx with mod_pagespeed, Apache.            Bugs fixing, code review;            Of course used Git, npm, bower, LESS, Jade and for development on PHP: phpDocumentor, Composer, Packagist.            Priority requirement in my job was: operating speed resource and SEO-friendliness.</p>
